MOHAN KAPAKAYALA

Visakhapatnam, Andhra Pradesh, India kapakayalamohan@gmail.com +918247558183 linkedin.com/in/mohan-kapakayala

SUMMARY

Full Stack Developer with 3 years of software development experience building responsive, scalable web applications using React.js, TypeScript, and modern web technologies. Hands-on experience developing backend applications and REST APIs using Python, Django, and Django REST Framework, with PostgreSQL and relational database concepts. Skilled in API integration, authentication, application state management, testing, and Docker. Focused on building maintainable full-stack applications and developing cloud deployment skills with AWS.

EXPERIENCE

Software Developer

Nueve IT Solutions **November 2023 - Present**

- Developed and maintained financial web applications using React.js and TypeScript, delivering responsive and reusable UI components aligned with business requirements.
- Integrated REST APIs and managed application state using Redux and Context API to support transaction workflows and reliable data handling.
- Built reusable components and optimized rendering behavior to improve maintainability and application performance.
- Implemented unit and integration tests using Jest and React Testing Library to improve application reliability and reduce regression issues.
- Collaborated with designers and backend developers to deliver financial application features, troubleshoot issues, and support production releases.

PROJECT

Debit Card, Dispute & Overdraft Management Suite — Digital Banking Platform

Full Stack Developer | Python, React 18, TypeScript, Nueve it solutions • February 2026 - Present

- Developed **3 full-stack digital banking modules**—Card Management, Dispute Management, and Overdraft Protection—using Python, React 18, TypeScript.
- Implemented debit card operations, including card lock/unlock, replacement, PIN setup, purchase limit management, and Apple Pay/Google Pay provisioning, improving self-service capabilities for banking customers.
- Integrated card processor and core banking REST APIs and developed dispute workflows for debit, ATM, and ACH transactions, streamlining dispute submission, document uploads, and status tracking.
- Improved backend reliability through centralized error handling and optimized concurrent API requests; strengthened security with MFA, PII masking, and sensitive-log redaction, and added automated backend tests using pytest.

Real Time Transactions

Full Stack Developer | Python, React 18, TypeScript, Nueve it solutions • October 2025 - February 2026

- Developed **2 full-stack digital banking extensions** for fund transfers and transaction activity using asynchronous Python, React 18, and TypeScript.
- Integrated Finxact core banking REST APIs to create, update, cancel, and retrieve one-time and recurring transfers, implementing OAuth2 authentication and token refresh handling.
- Designed a modular backend service layer to separate business logic and external API integrations; implemented step-up MFA, secure secrets management, sensitive data masking, and HMAC-SHA256 webhook verification.
- Built responsive transaction interfaces with filtering, pagination, bulk cancellation, and CSV export; automated builds and deployments using Docker and GitLab CI/CD, with backend testing using pytest.

EDUCATION

Bachelor of Technology, Electronics and Communication Engineering

Anil Neerukonda Institute of Technology and Sciences, Andhra Pradesh • Visakhapatnam • 2023 • 8.03

SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Context API

Backend: Python, Django, Django REST Framework, REST API Development, JWT Authentication

Database: PostgreSQL, SQLite, Django ORM

Tools, DevOps & Testing: AWS (EC2, S3, RDS, IAM), Docker, Linux, Git, GitHub, GitLab, Postman, Jest, React Testing Library
